

## **Clinical Governance Coordinator**

Neuroscience Research Australia (NeuRA), located in Sydney Australia, is an international leader in brain and nervous system research. Through laboratory and clinical research its goal is to find the causes of and cures for neurological and psychiatric diseases.

The role will assist the COO with the oversight of clinical governance at NeuRA and support researchers conducting clinical trials by (a) putting in place structures and processes to streamline regulatory aspects of trials, (b) monitoring legislative compliance, and (c) assisting researchers conducting clinics and clinical trials at NeuRA to meet their obligations to clinic patients, trial participants, funding sources and regulatory authorities. This fixed term appointment is for 12 months initially.

### Essential criteria:

- Familiarity with all aspects of clinical trials governance in Australia.
- Experience in providing oversight from a legislative perspective for small low-risk to large higher risk clinical trials including Phase II and Phase III trials.
- Bachelor of Nursing/Science or relevant higher qualification or 3-5 years' experience in clinical research trials and/or clinics.
- Prior experience in implementing measures to ensure adherence to clinical trials legislation and appropriate best practice clinical governance.
- Experience in process and systems improvement in a clinical or research environment.

### Desirable criteria:

- A qualification in Health Management or Clinical Research Coordination or equivalent.

Appointment to this position requires proof of qualifications. Certified copies of the required information must be provided prior to the commencement of duties.
